

COURSE OFFERINGS | FALL 2019

HONR 111.041: Entrepreneurship

Lauren Hill • MW - a •

This first-year experience course for Honors College students examines the process for developing research questions and exploring the opportunities available to Salisbury University students for conducting undergraduate research. Course sections are centered on a theme, so that students can focus their studies on a common topic. Students explore University library resources, participate in community engagement projects and present their research in a conference-like setting.

Meets General Education IA

HONR 111.042: Writing about Health Care

taia • T H - a •

HONR 112.041: American Era and the World

ert e er • T H - a • H

The course examines the interplay of American democracy and values with the evolving Western system of world order. The course describes how the nations of Western Europe sought to establish and maintain a system of international order, beginning in the late Medieval period, through the development of the concept of the sovereign nation state, relations among those states in 17th and 18th centuries, and the concern of the United States for a world order that would support its interests.

HONR 311.041/HIST 215.01H:

HONR 311.045: The History of Nursing

William A. Papp • MW 10:00-11:00

The course examines the history, trends, eras, compromises, accomplishments and challenges of the profession of nursing in America during the last 150 years. It also highlights the historical events that have shaped the profession.

HONR 496.042: thesis consultation

taia • p

This series of workshops is designed to aid students during the semester in which they are finishing their thesis research. Students are required to attend all sessions and submit their Honors Thesis to the Honors College for fulfillment of their Honors requirements.

INFO 333.151: printing, digital Enablement

Eugene Hahn • MW p • H

This is the class where you create the future! Every day, entrepreneurs are turning creativity and know-how into profit on platforms like kickstarter and indiegogo. Powerful technological developments including 3D printing and the Internet of Things are expected to greatly change businesses and society in the coming years. In this student-visioned class, you design and produce your own electronics product using 3D printing and the Arduino microcontroller platform. You introduce your functioning product to the Salisbury University community by way of presentations. The class assumes no prior knowledge with either
