Originally published in 1988, the essay helps readers recognize white privilege by making its effects personal and tangible. For many, white privilege was an invisible force that white people needed to recognize. It was being able to walk into a store and find that the main displays of shampoo and panty hose were catered toward your hair type and skin tone. It was being able to turn on the television and see people of your race widely represented. It was being able to move through life without being racially profiled or unfairly stereotyped. All true.

So, what is racism? One helpful definition comes from Matthew Clair and Jeffrey S.
Sociology on Racism

This privilege is invisible to many white people because it seems reasonable that a person should be extended compassion as they move through the world. It seems logical that a person should have the chance to prove themselves individually before

segregated towns and cities with sizeable populations of people of color from Baltimore to Birmingham, from New York to St. Louis, from Louisville to Oklahoma City, to Chicago, to Austin, and in cities beyond and in between.

These exclusionary zoning practices evolved from city ordinances to redlining by the Federal Housing Administration (who lived close to black people), to more insidious techniques written into building

Before the 2008 crash, people of color were disproportionately targeted for subprime mortgages. And neighborhood diversity continues to correlate with low property values across the United States. According to the Century Foundation, one-fourth of black Americans living in poverty live in high-poverty neighborhoods; only 1 in 13 impoverished white Americans lives in a high-poverty neighborhood.

The inequities compound. To this day, more than 80 percent of poor black students attend a high-poverty school, where suspension rates are often higher and resources often more limited. Once out of school, obstacles remain. Economic forgiveness and trust still has racial divides. In a University of Wisconsin study, 17 percent of white job applicants with a criminal history got a call back from an employer; only five percent of black applicants with a criminal history got call backs. And according to the National Bureau of Economic Research, black Americans are 105 percent more likely than white people to receive a high-cost mortgage, with Latino Americans 78 percent more likely. This is after controlling for variables such as credit score and debt-to-income ratios.

Why mention these issues in an article defining white privilege? Because the past and present context of wealth inequality serves as a perfect example of white privilege.

If privilege, from the Latin roots of the term, refers to laws that have an impact on individuals, then what is more effective than a history of laws that explicitly targeted racial minorities to keep them out of neighborhoods and deny them access to wealth and services?

And this example of white privilege serves an important purpose: It re-centers the
power of conscious choices in the conversation about what white privilege is.

People can be ignorant about these inequities, of course. According to the Pew

conscious choices *were* and *are* made to uphold these privileges. And this goes
beyond loan officers and lawmakers. Multiple surveys have shown that many white
people support the idea of racial equality but are less supportive of policies that could
make it more possible, such as reparations, affirmative action or law enforcement
reform.

In that way, white privilege is not just the power to find what you need in a
